Databases: MongoDB, MySQL, PostgreSQL, Firebase, Supabase

Projects

BlazeKart | *React.js, Express.js, Tailwind CSS, MongoDB, Redux Toolkit, jwt, Stripe.js*
- Blazekart is an e-commerce platform designed to provide users with a seamless online shopping experience.
- Implemented optimized rendering using lazy loading, secure payment processing using stripe.js, and efficient order management using redux toolkit and rtk query.
- Developed robust backend systems to manage product inventory, customer data, and categorizing products effectively.

Connectify | *Next.js, Tailwind CSS, Clerk.js, Stream*
- This is a video conferencing platform similar to zoom or Google Meet where users can easily connect and communicate.
- Used various technologies such as clerk.js for robust user management and authorization.
- Implemented stream api, sdk and components to handle video conferencing tasks efficiently.

CryptoGuru | *React.js, Tailwind CSS, Chakra UI, axios*
- CryptoGuru addresses various challenges associated with accessing and comprehending cryptocurrency information, offering a comprehensive solution.
- This platform offers access to multiple exchanges, facilitating seamless cryptocurrency trading.
- It features a dedicated coins section providing comprehensive details about each cryptocurrency, along with a trending page to stay updated on market trends.

Volunteering
